

Planar 78

planar 78

The Rega **Planar 78** mono turntable is designed specifically to play 78's.

The plinth design is of a low mass particulate core sandwiched by highly rigid phenolic laminates.

The P78 uses a derivative of the new ultra low vibration state of the art rigid mounted motor assembly borrowed from the P3.

The Platter is CNC machined HDF which is then metalized, giving a platter with good mass and accuracy.

Finally, the P78 carries the legendary Rega RB250 tonearm, (The choice of many other turntable manufacturers).
