

Wadia 170iTransport

A small revolution...

The iTransport is the first ever component specifically designed to transform your iPod into a high-resolution audio/video media server. The iTransport combines the convenience of personal audio with the performance and connectivity of your home audio/video system, delivering bit-perfect digital audio signal via a coaxial S/PDIF output, DVD quality video via component outputs, and built on a sleek aluminum chassis.

When the iPod docks with iTransport, the iPod transforms into an audiophile-grade media server that rivals some of the top performing digital source components available. The iTransport is available directly from Wadia, or you can experience the iTransport for yourself at a Wadia dealer near you.

Performance and connectivity inspired Wadia engineers to take the iPod to the next level in digital audio design. With bit perfect S/PDIF output, high-resolution DVD quality component video outputs, and an external power supply, the iTransport represents the perfect balance of performance, convenience, and value. The iTransport also comes with an IR remote, coaxial digital cable, iPod adapter inserts, and user manual.

Supported iPod Models	
iPod 5th generation (video) 30GB	iPod nano 1st generation 1GB 2GB 4GB
iPod 5th generation (video) 60GB 80GB	iPod nano 2nd generation (aluminum) 2GB 4GB 8GB
iPod classic 80GB 160GB	iPod nano 3rd generation (video) 4GB 8GB
iPod touch 8GB 16GB 32GB	

Please Note:

Current generation iPod products provide full user menu and click wheel function when docked. These product also allow simultaneous digital audio output.

iPod nano 1st generation and iPod 5th generation (video) lack this same ability. These products allow digital output, but do not provide full user menu and click wheel function while docked. Please see user manual for operating instructions.

Please Note:

The Video Outputs on the 170iTransport act as a high performance pass-thru from the iPod. At this time the iPod does not output its Graphical User Interface Menu. This means that you will not be able to see iPod menu's on your television monitor.

Technical Specifications	
Digital Output	One S/PDIF Coax (RCA)
Analog Outputs	One pair of Unbalanced (RCA)
Video Outputs	One set of Component Outputs One S/Video Output
Dimensions	Inches: 2.7 h 8 w 8 d Centimeters: 6.86h 20.32w 20.32d
Power Consumption	6 Watts
Finish Options	Silver Powder Coated Aluminum
Weight	2.42 lbs. (1.1 kg)
What's in the Box	170iTransport Remote Control Coaxial Digital Cable Dock Adapters Power Supply User Guide
